DESCRIPTION OF SUBURBAN RESIDENTIAL

Suburban Residential. This subcategory predominantly promotes single family detached dwellings in subdivision settings with higher density single family attached or multi-family developments at appropriate locations. Mixed use developments that are predominantly single family in nature but may include attached or multi-family dwellings are also anticipated in this district. The following images below are examples of housing types and development patterns that are believed to be appropriate in this district. Other appropriate housing types are townhouse, condominiums, apartments and senior citizen housing. It is important to note that in Suburban Residential areas, smaller lot developments, cluster developments, and attached/multi-family developments should incorporate substantial park or open space. Where appropriate, mixed use developments which contain small scale commercial or office in addition to residential uses may be allowed. Small scale office developments may be located at appropriate locations to serve a small market area in nearby neighborhoods.
